

World Geography and Culture Online

**COMING
SOON!**

An improved new version of Facts On File's acclaimed *World Atlas*, the new *World Geography and Culture Online* reference site takes a global approach to facilitate the study of countries, places, peoples, and geography concepts and skills. This comprehensive resource makes it easy to study all aspects of a country—from its geography and physical features to its government, people, and society—providing both facts at a glance and in-depth coverage through country entries, maps, flags, images, statistics, news articles, a gazetteer, and more.

In addition to country-specific information, this accessible online resource includes a special feature illustrating basic geographical concepts, tools to compare and rank countries, a useful geography glossary, a handy conversion calculator, and a currency converter, as well as information on U.S. states. Gateway pages for the gazetteer and for geography concepts and principles offer users a convenient way to discover geographical information.

Ideal for social studies classrooms and projects as well as for general country research, *World Geography and Culture Online* features an easy-to-navigate interface. Search and browse features allow users to research more specific aspects and issues in depth, and tabbed search results allow for quick navigation among record types. Full citations—in MLA and Chicago formats—are available throughout as well as the ability to print, copy, and save content for personal use.

Features:

- **Country Entries:** descriptions of more than 200 countries and non-sovereign states, with information on geography, people and culture, weather and climate, history, government, and society; maps and flags; facts and figures; images; compare/rank tools; and news articles
