"...ideally suited to support the science curricula."—LJ NETCONNECT
 "...valuable..."—KLIATT

An Authoritative and Highly Visual Science Resource

The award-winning *Science Online* offers a comprehensive, curriculum-oriented overview of a broad range of scientific disciplines in a variety of useful formats. The acclaimed online database remains the ideal science solution for schools and libraries.

The accessible, curriculum-oriented content is organized by subject area and type of resource, as well as by national and state science education standards. Users can follow an extensive network of hyperlinks and suggested searches to related topics. Tabbed search results and Boolean search capabilities help users easily find their desired results. High-quality print, e-mail, reduce and enlarge text, and save to folder capabilities; full database citations; a help page; and persistent record links are also available.

Features:

- **Topics, Terms, and Principles:** thousands of essays on major topics and issues in science and technology
- **Images, Videos, and Animations:** more than 6,900 printable

diagrams, illustrations, and images, many in full color; hundreds of videos and flash animations covering a variety of scientific disciplines

- **Experiments and Activities:** more than 1,100 science experiments and activities covering key principles in science, indexed by grade range, subject category, and time required
- **Biographies:** thousands of biographies of key scientists throughout history, many with accompanying images
- **Definitions:** thousands of definitions
- **News Articles:** a "Science in the News" section featuring regularly updated news articles (news articles also come up in search results)
- **Timeline:** an extensive chronology of science history, organized by time period or scientific topic, and searchable by year or keyword, updated monthly
- **National and State Science Education Standards:** authoritative content tied directly to the curriculum
- **Special Features:** "Today's Science Feature" highlights recent scientific events and discoveries with in-depth articles from *Today's Science*, updated frequently with new articles; a "Focus On" section providing an examination of specific areas, such as videos of everyday objects under the microscope.
