"...marvelous and useful and the PDF files are easy to use... you get the added web value of broad, ready, remote access, as well as printing and searching...recommended..."

—LIBRARY JOURNAL

"...help[s] fill a gap in reference collections...straightforward and extremely easy to use..."—BOOKLIST

"...an excellent resource for educators and students... recommended for libraries serving students and educators in junior-high through undergraduate school settings."

—AMERICAN REFERENCE BOOKS ANNUAL

"...offers the speed and ease of online searching and a wealth of useful handouts to supplement curriculum. Educators will warmly welcome it."—KLIATT

## An Electronic Library of Printable Teacher Handouts

*Curriculum Resource Center* gives teachers fast access to thousands of easily reproduced handouts to supplement text and lesson plans used in middle school, high school, and junior college classrooms. Making Facts On File's broad range of authoritative, curriculum-supporting loose-leaf binder reference materials available in a user-friendly electronic format, this expansive collection of maps, full-color diagrams, images, experiments, timelines, and other visual educational resources is conveniently arranged by subject (e.g., history, government, religion, geography, science, math, and health and fitness). Each handout can be saved, e-mailed, printed, or distributed for educational purposes. New persistent record links make it easy for students to return to specific pages.

## Clean, Clear, Visual Learning Aids

The curriculum-related handouts clearly present a wealth of visual information on key concepts, events, people, and places. Covering core subject areas including U.S. and world history, science, and geography, *Curriculum Resource Center* is the ideal tool for maximizing classroom resources.

Curriculum Resource Center: ISBN 978-0-8160-5035-2.

## Features:

- **History:** more than 4,800 historical maps, fact sheets, images, and timelines that cover the entire span of U.S. and world history
- **Government:** handouts on various governing bodies around the world, including their structure and function
- **Religion:** handouts on various religious faiths, leaders, rituals, and festivals
- **Geography:** more than 500 printable maps—geographical maps, including political, elevation, and outline maps of continents, regions, and every country, U.S. state, and Canadian province or territory; statistical maps, with information on population and other social and economic indicators
- **Science:** full-color diagrams that facilitate visually oriented learning of key science topics from all sections of the curriculum; hands-on activities, some in color, for science education in subjects such as biology, chemistry, Earth science, physics, weather, and space
- **Math:** problem sets ranging from simple to advanced levels, arranged by subject—algebra, geometry, and calculus
- **Health and Fitness:** handouts organized into health topics—from health and safety to sports rules
- **My Folders:** a unique, easy-to-manage feature that allows users to save entries either for one session (without logging in) or for multiple sessions (after logging in).
