## Comprehensive Coverage of Modern World History

*Modern World History Online* covers the full scope of world history from the mid-15th century to the present. Thousands of fully hyperlinked subject entries, biographies, images and videos, maps and charts, primary sources, and timeline entries combine to provide a detailed and comparative view of the people, places, events, and ideas that have defined modern world history. More than 440 historical videos make the study of history accessible and compelling, and a dictionary tool with more than 34,000 entries allows users to look up unfamiliar words without leaving the database.

Unique Learning Centers pull forward interesting entries handpicked by our editors to help users find a starting point for their research. Each Learning Center and each record has a persistent record link, enabling teachers to direct their students to specific areas of study. Users can search content by keyword or phrase or browse by topic, era, or region, corresponding to the National Standards for World History depending on their needs. Search results are conveniently organized under tabs by record type. Biographies can also be browsed by occupation, Primary Sources by type, and the Timeline by year. Full citations are available throughout, and users can print, copy, and save content to a folder for personal use.

*Modern World History Online* offers an abundance of reliable, well-organized information, drawn from Facts On File’s acclaimed print titles. It is the perfect one-stop source for researching modern world history, bringing together in a single online reference database content that has traditionally been diffused throughout many print sources.
